

# State of South Dakota

EIGHTY-FIFTH SESSION  
LEGISLATIVE ASSEMBLY, 2010

363R0643

## HOUSE CONCURRENT RESOLUTION NO. 1009

Introduced by: Representatives Kopp, Bolin, Brunner, Cronin, Curd, Feickert, Gosch, Greenfield, Hamiel, Hoffman, Hunt, Iron Cloud III, Jensen, Juhnke, Kirkeby, Lange, Lederman, Moser, Novstrup (David), Olson (Betty), Olson (Ryan), Pitts, Putnam, Rausch, Russell, Schlekeway, Sly, Steele, Tidemann, Turbiville, Van Gerpen, Verchio, and Wink and Senators Brown, Abdallah, Bradford, Haverly, Maher, and Schmidt

1 A CONCURRENT RESOLUTION, Calling for balanced teaching of global warming in the  
2 public schools of South Dakota.

3 WHEREAS, the earth has been cooling for the last eight years despite small increases in  
4 anthropogenic carbon dioxide; and

5 WHEREAS, there is no evidence of atmospheric warming in the troposphere where the  
6 majority of warming would be taking place; and

7 WHEREAS, historical climatological data shows without question the earth has gone  
8 through trends where the climate was much warmer than in our present age. The Climatic  
9 Optimum and Little Climatic Optimum are two examples. During the Little Climatic Optimum,  
10 Erik the Red settled Greenland where they farmed and raised dairy cattle. Today, ninety percent  
11 of Greenland is covered by massive ice sheets, in many places more than two miles thick; and

12 WHEREAS, the polar ice cap is subject to shifting warm water currents and the break-up  
13 of ice by high wind events. Many oceanographers believe this to be the major cause of melting

1 polar ice, not atmospheric warming; and

2 WHEREAS, carbon dioxide is not a pollutant but rather a highly beneficial ingredient for  
3 all plant life on earth. Many scientists refer to carbon dioxide as "the gas of life"; and

4 WHEREAS, more than 31,000 American scientists collectively signed a petition to  
5 President Obama stating: *"There is no convincing scientific evidence that human release of*  
6 *carbon dioxide, or methane, or other greenhouse gasses is causing or will, in the foreseeable*  
7 *future, cause catastrophic heating of the earth's atmosphere and disruption of the earth's*  
8 *climate. Moreover, there is substantial scientific evidence that increases in atmospheric carbon*  
9 *dioxide will produce many beneficial effects on the natural plant and animal environments of*  
10 *the earth":*

11 NOW, THEREFORE, BE IT RESOLVED, by the House of Representatives of the Eighty-  
12 fifth Legislature of the State of South Dakota, the Senate concurring therein, that the South  
13 Dakota Legislature urges that instruction in the public schools relating to global warming  
14 include the following:

- 15 (1) That global warming is a scientific theory rather than a proven fact;
- 16 (2) That there are a variety of climatological, meteorological, astrological, thermological,  
17 cosmological, and ecological dynamics that can effect world weather phenomena and  
18 that the significance and interrelativity of these factors is largely speculative; and
- 19 (3) That the debate on global warming has subsumed political and philosophical  
20 viewpoints which have complicated and prejudiced the scientific investigation of  
21 global warming phenomena; and

22 BE IT FURTHER RESOLVED, that the Legislature urges that all instruction on the theory  
23 of global warming be appropriate to the age and academic development of the student and to  
24 the prevailing classroom circumstances.
