4. Afford tenants access to and an opportunity to acquire copies of all operating budgets or financial statements respecting the project in which such tenants reside, to the extent that such budgets and statements are required by law to be kept by the commissioner or supervising agency.

5. Permit any tenant, duly constituted tenants' association, duly constituted cooperators' advisory council or his, hers or its duly authorized representative to audit the books of the company and to have access during normal business hours to the financial records upon which the company's financial statements are based.

6. Promulgate regulations relating to managing agents, including criteria for the eligibility for selection and the compensation of managing agents by companies organized pursuant to this article. Such regulations shall provide, among other things, that any contract with a managing agent entered into after September first, nineteen hundred seventy-seven shall be terminable for cause and shall be terminable, with or without cause, at least every twelve months after commencement of the term thereof, and that promptly upon termination the managing agent shall turn over to the company all project records, rent rolls, bills, cancelled checks, bank statements and other papers owned by such company.

The energy audit shall be conducted by a public utility, an engineer or architect licensed by the state, or the managing agent or other representative of the company if such individual has attended an energy audit training workshop sponsored by the commissioner or the state energy office. A copy of the energy audit report, required herein, shall be given to any duly constituted tenant's association or cooperator's advisory council and a copy shall be available for inspection and copying by any individual tenant who requests it. The commissioner or supervising agency shall also require that every company certify by March thirty-first, nineteen hundred eighty-four that all compatible conservation measures identified in the energy audit report which have simple payback periods of one year or less have been implemented; provided, however, if the commissioner or supervising agency determines within sixty days of the date the energy audit report is filed that one or more of such identified conservation measures cannot be implemented by March thirty-first, nineteen hundred eighty-four, given the projected rent revenues and other monies available to the company from reserve funds, loans or grants from the state or federal government or any other source, the implementation of such conservation measures shall be provided for according to a schedule prescribed by the commissioner or supervising agency.
