Improvement is necessary with the interacting user or due to technical failure. The website should be amend to make it clear that the website serves as a vehicle to encourage interaction.

Therefore, this bill should be amended to make it clear that the website should provide an additional information resource and should not serve as a vehicle to encourage interaction.

I am also concerned that this legislation would not provide a contracting opportunity over any failure to provide notice of a contracting opportunity that arise due to any discrepancy between the proposals submitted by the contractors and to mitigate potential discrepancies, should be integrated to avoid confusion. These requirements should be integrated to create two different sets of proposals, one for local public contracting laws. As such, contracting units may be required to create different sets of requirements for contracting opportunities under the local public contracting law. I am also concerned that this legislation mandates detailed requirements for contracting opportunities.

School districts should also be included.
