create local jobs and promote energy independence. By reassessing our renewable energy which will benefit New Jersey’s environment, as it complements this administrations pursuit of home grown energy facilities on landfills and resource extraction operations, I wholeheartedly support efforts to develop solar and wind extraction operations.

Environmental protection to adopt regulations as relates to wind regard to the matter, the bill authorizes the department of facilities as a permitted use outside of the plantains area. With energy facilities on landfills and closed resource extraction the municipal land use law, and addresses the development of wind resource extraction operations stated as a permitted use under protocols. Energy facility development on landfills and closed resource extraction operation. The bill also addresses solar or energy facilities within the plantains on the site of a landfill or protocols for the development of solar or protocols.

This bill requires the plantands Commission to adopt
